The Federation of Galaxy Explorers is a 501 (c) 3 non-profit organization. The purpose of the Federation of Galaxy Explorers is to educate and inspire America's youth in space related science and engineering.

We train volunteers and teachers in schools and organizations to run after school "Mission Teams" teaching children fun-to-do educational activities. No special knowledge of space is required!

The Federation of Galaxy Explorers was created to prepare children for the future. Members (Galaxy Explorers) learn with fun educational materials at monthly Mission Team meetings, Space Camps, Star Parties, and occasional field trips. Galaxy Explorers learn about the science and technology that is shaping their lives.

Interested in bringing Galaxy Explorers to your school, company, or local organization? All you have to do is visit us online at www.foge.org and sign yourself or your organization up to become a member of The Federation of Galaxy Explorers. You can also contact us at the address list below:

2006 FOGE SPACE ART
EXHIBIT

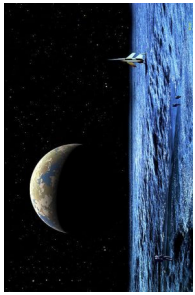

The Federation of Galaxy Explorers' goal is to inspire and educate children (and adults) in space related science and engineering. We strive to prepare children for the future; a future that includes a space-faring civilization.

Our 2006 Space Art Exhibit features artists that are talented and strong supporters of the Federation of Galaxy Explorers. Take some time and look into the future of space exploration. These bold portraits illustrate humanity's future among the cosmos.

The works of art shown in this brochure were selected for the 2006 FOGE Space Art Exhibit. Please nominate your favorite artist from this year's exhibit for our Space Art Inspiration Award.

Also if you would like to nominate someone or their works of art for consideration for the 2007 exhibit or if you have some space art of your own you would like to provide for next year's exhibit, please let us know.

Thank you for taking time to visit our exhibit. You can find out more about The Federation of Galaxy Explorers from our web site www.foge.org or call 1-877-761-1266 today.
